

Paper Scoring for Beginners

Washington District 9 Little League

Thanks for keeping score!

This series of pages attempts to make “keeping the book” for Little League games easy. We’ve tried to be comprehensive while simplifying the most basic scorekeeping skills and describing them in terms that even our players can understand.

The Scoresheet is important. It is the official game record for District 9 All-Star tournament games and is used to record every pitch, at bat, and defensive play. The book is used during the game to confirm who is next to bat, how many pitches the pitcher has thrown and where runners were on base before the last play. The book is used after games to calculate player and team stats.

What does being a scorekeeper mean?

Keeping score means that you fill an important role both for your team and the league. Scorebooks provide documentation of all league games while also confirming pitch counts and player eligibility.

The Scorebook

INTRODUCTION:

This is what a page of the scorebook looks like. This may not look exactly like the score sheet you receive at all tournament games, but this document will give you enough information to know how to use any scoresheet and how to complete the information you need to score a game.

There are a lot of abbreviations and spaces to collect every action that occurs on the field during play. It looks like a complicated mess, and you're probably saying, "Why did I sign up to do this?"

Don't panic. We'll break this down together, and you will see that it is pretty easy to understand.

Let's start by understanding how this page is structured.

The scorebook page is divided into several sections:

- PLAYERS:** A table with columns for NO, LAST, FIRST, and S (Side).
- VS:** A 9x9 grid for recording plays in each inning.
- DATE TIME:** Fields for recording the date and time of the game.
- PLACE:** A 9x9 grid for recording the location of plays.
- PITCH COUNT:** Two vertical columns for recording the number of pitches thrown by each pitcher.
- INNING TOTALS:** A table for recording totals for each inning, including Runs, Hits, Errors, and Left On Base (LOB).
- FINAL SCORE:** A box for recording the final score of the game.
- UMPIRE SIGNATURES:** A box for recording the signatures of the umpires.
- SCORER:** A box for recording the name of the scorer.

Batting Order (Lineup)

Now let's look at the parts we must pay attention to and how they're structured.

The left-hand column is where the batting order is listed. There is room for 15 players in the batting order, but most LL teams will have 13 players or less.

There are two spaces for each position in the batting order. One for the starting player and one for a substitute player.

We can ignore substitutes. All players bat.

The manager from each team will provide the scorekeeper with the batting order.

The scorekeeper writes the players' names, in order, in the spaces provided along with their jersey #.

The image shows a standard baseball scorebook page. A red rectangular box highlights the batting order grid, which is a table with 15 rows (numbered 1-15) and 9 columns (numbered 1-9). Each row has two columns for player information: 'NO.' and 'LAST FIRST'. The grid is used to record the batting order for each team during the game.

Below the batting order grid, there are sections for 'INNING TOTALS' and 'RUNNING TOTALS'. The 'INNING TOTALS' section has columns for 'RUNS', 'HITS', and 'ERRORS' for each of the 9 innings. The 'RUNNING TOTALS' section has columns for 'LOB', 'SB', and 'E' for each of the 9 innings.

At the bottom of the page, there are sections for 'PITCHERS', 'PITCHES BY INNING', 'TOTALS', 'GAME NOTES', 'TEAM TIME OUTS', 'LIMPER', 'SIGNATURES', and 'SCORER'. The 'PITCHERS' section has columns for 'TOTALS', 'W', 'L', 'IP', 'AB', 'R', 'H', 'SO', 'BB', and 'ER'. The 'PITCHES BY INNING' section has columns for each of the 9 innings and a 'TOTAL' column. The 'TOTALS' section has columns for 'TOTAL', 'W', 'L', 'IP', 'AB', 'R', 'H', 'SO', 'BB', and 'ER'. The 'GAME NOTES' section has a large empty space for writing. The 'TEAM TIME OUTS' section has a small table with columns for '1', '2', '3', '4', '5', '6', '7', '8', and '9'. The 'LIMPER' section has a column for 'LIMPER'. The 'SIGNATURES' section has a column for 'SIGNATURES'. The 'SCORER' section has a column for 'SCORER'.

At the bottom of the page, there is a small diagram of a baseball diamond with the bases labeled '1', '2', '3', and '4'. The number '3' is written in the center of the diamond.

At the very bottom of the page, there is a small copyright notice: "© Tom Glover 1982-2007 • P.O. Box 956, Forestville, CA 95638 • Phone or FAX (707) 887-2812 • www.glovers-scores.com".

Inning Columns

There is an individual column for each inning. There are nine innings shown but in Little League we only play 6 innings (7 in the Jr/Sr division).

Columns tell the “story of the game.” They tell us who did what and in what order things happened.

Player Rows

There is an individual row for each player.

Rows tell the “player’s achievements” during the game. They tell us what a specific player did, how it affected the game, and when they did it.

Recap

So far we've learned:

- 1) Where to put players' names in the batting order.
- 2) What the inning columns are for.
- 3) What the player rows are for.
- 4) Where to document pitcher and catcher information

Comment:

Each game will have two pages—one for your team and one for the opposing team. You will be keeping score for the whole game, not just for one team.

The scorebook page is divided into several key sections:

- Top Section:** Contains fields for PLAYERS, VS, DATE, TIME, and PLACE. Below this is a grid for recording play-by-play for each of the 9 innings, with columns for each team and rows for each inning.
- Right Side:** Features two columns for PITCH COUNT, one for each team, with rows corresponding to each of the 18 players.
- Bottom Section:** Includes summary tables for INNING TOTALS (Runs, Hits, Errors), RUNNING TOTALS (LOB, ER), and PITCHERS (NO. PITCHERS, TOTALS, W, L, IP, AB, R, H, SO, BB, ER). It also has a PITCHES BY INNING table and a FINAL SCORE section.
- Additional Fields:** Includes GAME NOTES, TEAM TIME OUTS, UMPIRE, SIGNATURES, and SCORER.

Pitchers and Catchers

FOR MINORS AND ABOVE: As the teams prepare for the first inning, you'll need to document who is pitching. These are important for pitch counting and player eligibility. Some scoresheets have this at the top of the scoresheet. For D9 tournaments, pitcher information (for both teams) may be on the far-right side.

Pitcher's names and numbers will be documented in the bottom the lineup, or in the pitcher columns on the right (include just jersey #s in the right columns).

NOTE: You'll document the pitcher from the Home Team on the Visitor's sheet, and vice versa. This is done so you can see who pitched to which batters.

The image shows a standard baseball scorebook page. At the top, there are columns for 'PLAYERS' (NO, LAST, FIRST, S) and 'VS' (1, 2, 3). The main body of the page is a grid for recording plays, with columns for each team and rows for each batter. On the right side, there are two columns labeled 'PITCH COUNT' for each team, with sub-columns for 'P', 'I', 'B', and 'S'. A red box highlights these columns, and an arrow points to them from a text box that says 'Include Pitchers jersey # here'. At the bottom of the page, there is a section for 'PITCHERS' with columns for 'TOTALS', 'W', 'L', 'IP', 'AB', 'R', 'H', 'SO', 'BB', 'ER', and 'PITCHES BY INNING'. A red box highlights this section, and an arrow points to it from a text box that says 'Include Pitcher name and jersey # here'. The bottom of the page also includes sections for 'GAME NOTES', 'TEAM TIME OUTS', 'UMPIRE', and 'SIGNATURES'.

Include Pitcher name and jersey # here

End of a Half-inning

When a player makes the third out the other team comes to bat.

Let's say that #8, Connor, got the 3rd out. After you finish noting what occurred in his box, you then make a mark to indicate that he made the last out (see example).

Some scorekeepers will add a squiggly line to remind themselves that the remaining players did not bat in the inning. Some will use a diagonal line to help find the lead-off batter for the next inning, while others will use a heavy horizontal line (see examples). As long as your marks help you move to the next inning and are consistent, you're fine.

Remember that you created a page for the other team too. At this point, you turn to the other team's page and continue scoring the other team's at bats according to their lineup.

The image shows a page from a baseball scorebook, specifically the "SCORER" section. The page is divided into two main sections: "VISITORS" and "HOME". The "HOME" section is further divided into "INNING" and "PLAYER". The "INNING" section has columns for "POS", "PO", "A", "E", "PO", "A", "E", and "PI". The "PLAYER" section has columns for "NO.", "PLAYERS", "POS", "1", and "2". The "PLAYERS" column lists the following players: Steve (24), Bobby (42), Joe (3), Jim (13), Alex (7), Connor (8), Dylan (66), Scott (1), Dave (77), and Adam (12). The "POS" column lists the positions for each player. The "1" and "2" columns contain diamond diagrams representing the field. A squiggly red line is drawn across the bottom of the player boxes for Connor, Dylan, Scott, Dave, and Adam, indicating that they did not bat in the inning. A black arrow points to the line with the text "OUT #3".

The Box

The box is where all the game details are captured. It's a tiny piece of real estate that requires scorekeepers to make quick and accurate notes about the game. The notes scorekeepers need to make are both logical and require some baseball shorthand. Let's start by looking at the box more closely.

Box Anatomy

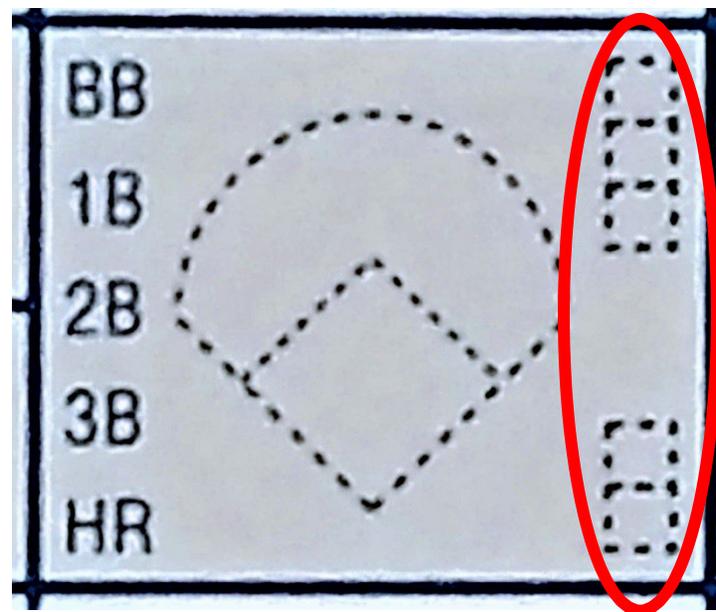

There are several things already in the box. Let's understand what each thing is and what scorekeepers need to do.

What is it (see red circle)?

It's a way to keep track of the pitches to the batter. There are three squares for balls and two squares for strikes.

What do you do?

Add a mark in each box according to whether a pitch was a ball or a strike.

What is it (see red circles)?

- 1) Type of hit; walk (BB), single, double, triple, or home run.
- 2) A baseball diamond with 4 bases and an outfield.

We will review this briefly when we discuss how to record a play.

What do you do?

Step 1 - Circle the one that corresponds to the type of hit the batter got.

Step 2 – Connect the bases that the batter touched on his hit.

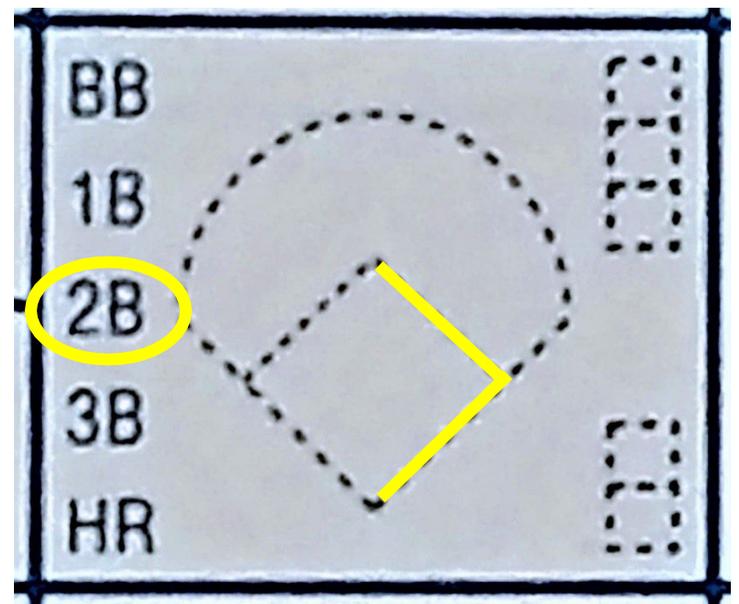

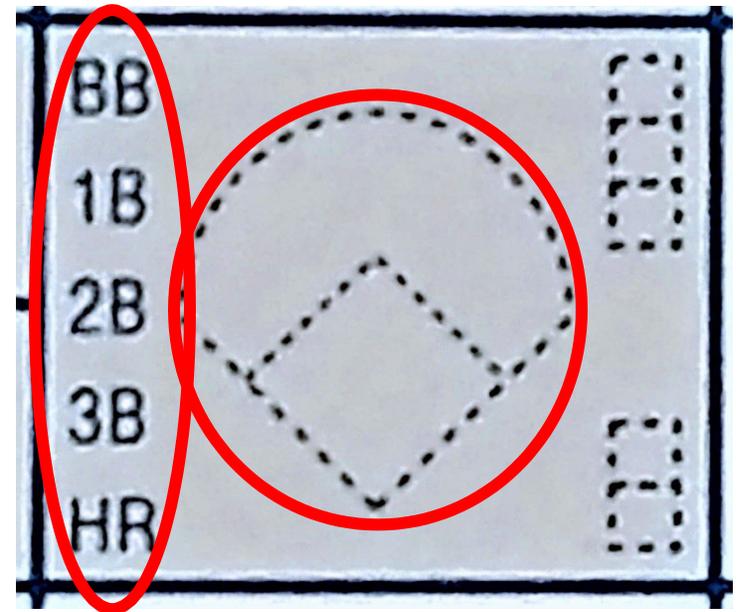

For example:

John hit a double.

What do you do?

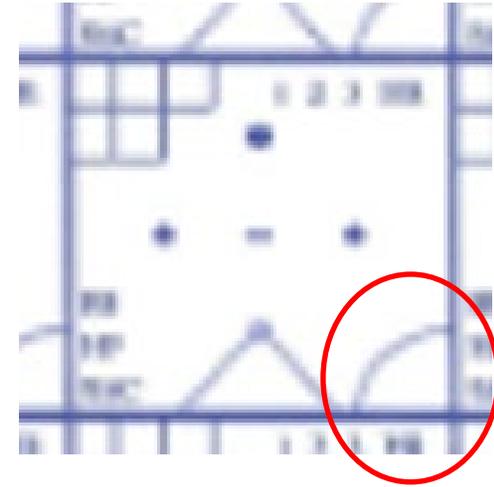

Step 1 - Circle the “2B”

Step 2 – Draw a line that connects home-to-1st-to-2nd.

What is it?

The books D9 LL uses has a dedicated spot for an out (see red circle), yet some scoresheets do not have a spot to mark an out as noted in the example with the yellow circle below.

What do you do?

- 1) Write in a number 1, 2, or 3 corresponding to the out made; first, second, or third out, and circle it.
- 2) Record the play that resulted in an out.

For example

Marcus is at bat with no outs. Marcus hits a ground ball to the second baseman. The second baseman caught the ball and threw it to the first baseman to force Marcus out at first base. 1 out.

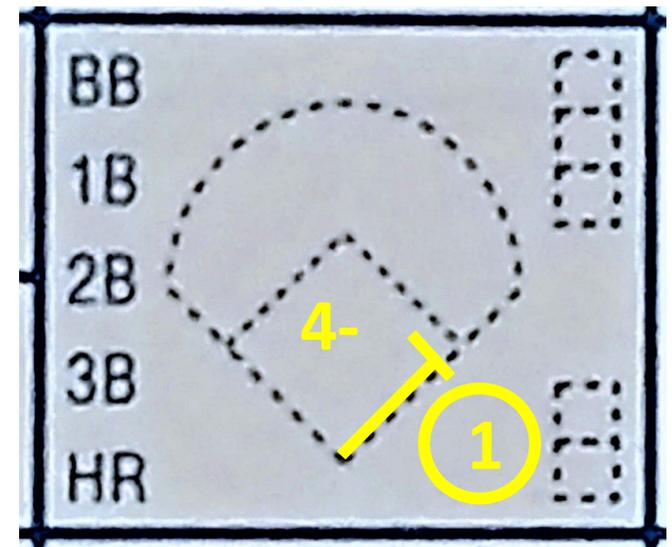

What do you do?

Step 1 – Write a number 1 in the lower right-hand corner of the box and circle it.

Step 2 – Draw a line from home plate part way to 1st base, with a line crossing it. This shows the base the player did not reach.

Step 3 – Record the play (“4 – 3”).

We’ll describe this in a little bit.

Record a Play

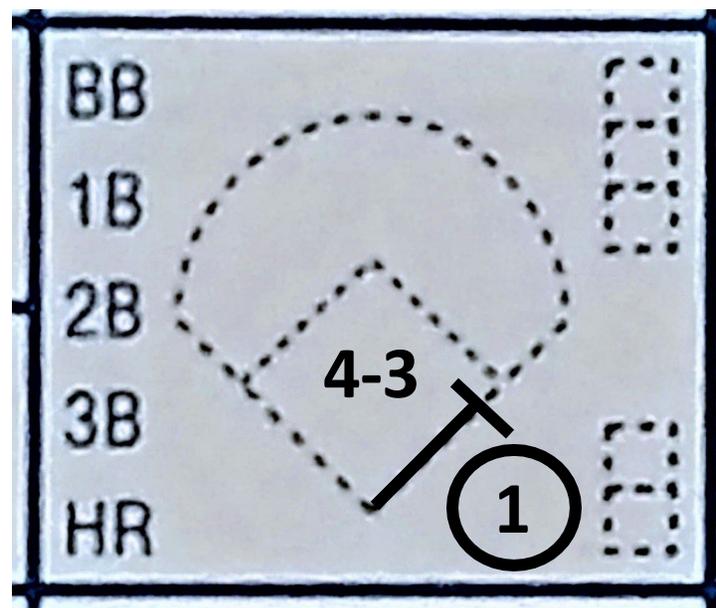

If there is a tricky part to score keeping, it's how to record a play.

If you recall, the last example described a play where Marcus was at bat with no outs and hit a ground ball to the second baseman. The second baseman caught the ball and threw it to the first baseman to force Marcus out at first base.

You'll see the notation of the play in the box as "4 - 3" without number 1 recorded.

How in the world did we come up with that?

Let's find out. It's actually not that difficult.

How Parents See the Field

As parents we tend to see the field according to the names of the players.

Imagine Marcus' hit one more time. He hit the ball to Chris. Chris caught it and threw it to Jackson who touched first base and forced Marcus out.

In shorthand, we could write "Chris-to-Jackson, for 1 out."

How could we possibly write all that inside the teeny tiny box?

We can't. There just isn't enough space.

Let's look at how scorekeepers do it.

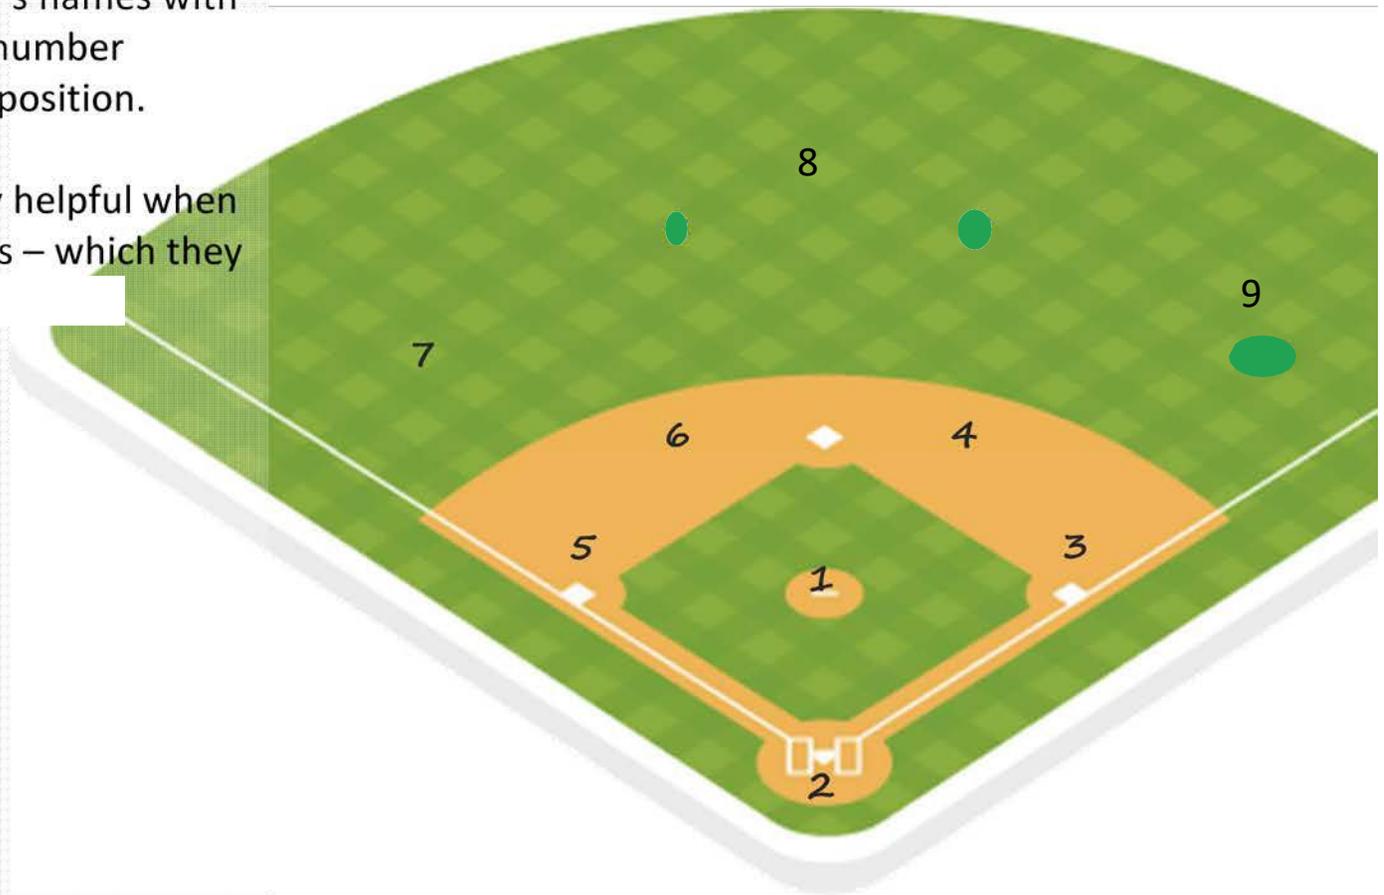

How Scorekeepers See the Field

Scorekeepers simplify the view of the field by replacing player's names with a unique number. The number represents the player's position.

This convention is really helpful when players change positions – which they do almost every inning

- 1- Pitcher
- 2- Catcher
- 3- First Base
- 4- Second Base
- 5- Third Base
- 6- Shortstop
- 7- Left field
- 8- Center Field
- 9- Right Field

These numeric representations are always the same and do not change.

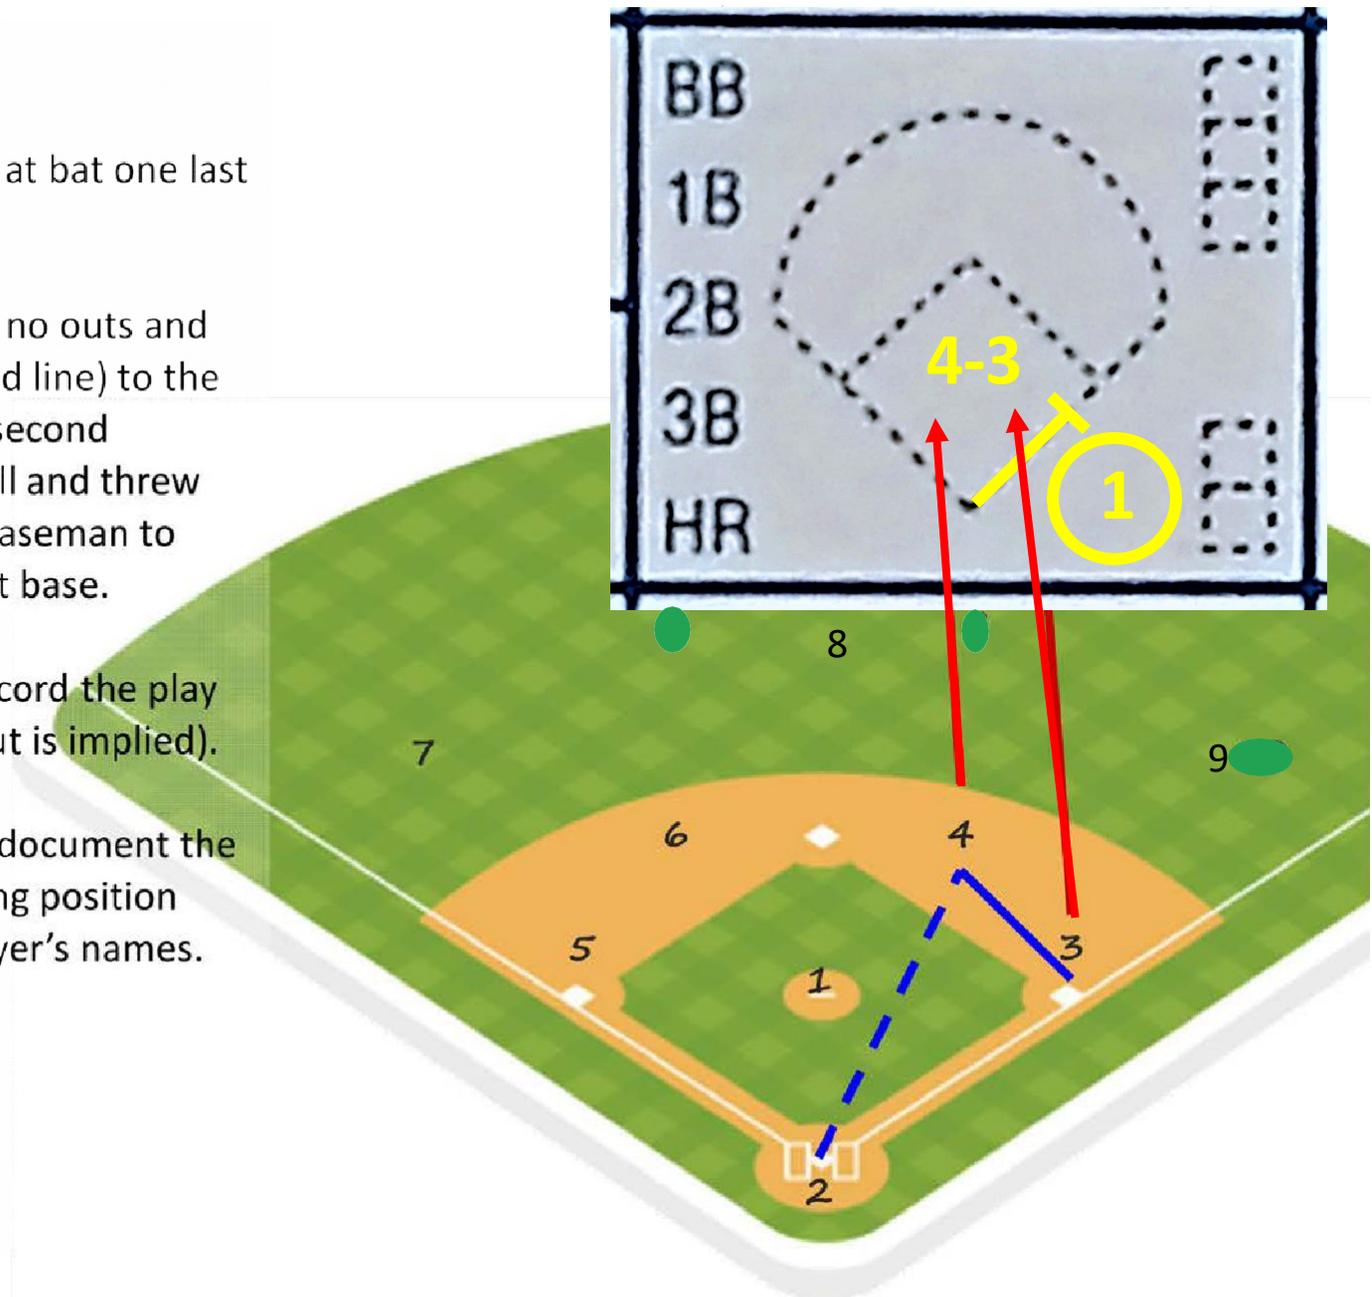

Summary

To summarize Marcus's at bat one last time.

Marcus was at bat with no outs and hit a ground ball (dashed line) to the second baseman. The second baseman caught the ball and threw (solid line) to the first baseman to force Marcus out at first base.

The scorekeeper will record the play as a 4 – 3 putout (putout is implied).

Basically, scorekeepers document the play as it happened using position numbers instead of player's names.

Recording Sequential Plays

Let's walk through a half-inning to illustrate how scorekeeping works during a game.

Steve (#24) bats first. He takes a ball, two strikes, then hits a single.

Record the ball and strikes with a line through the box.

Then record his single, and draw the line showing he is on first base.

HITS LOB HITS LOB HR

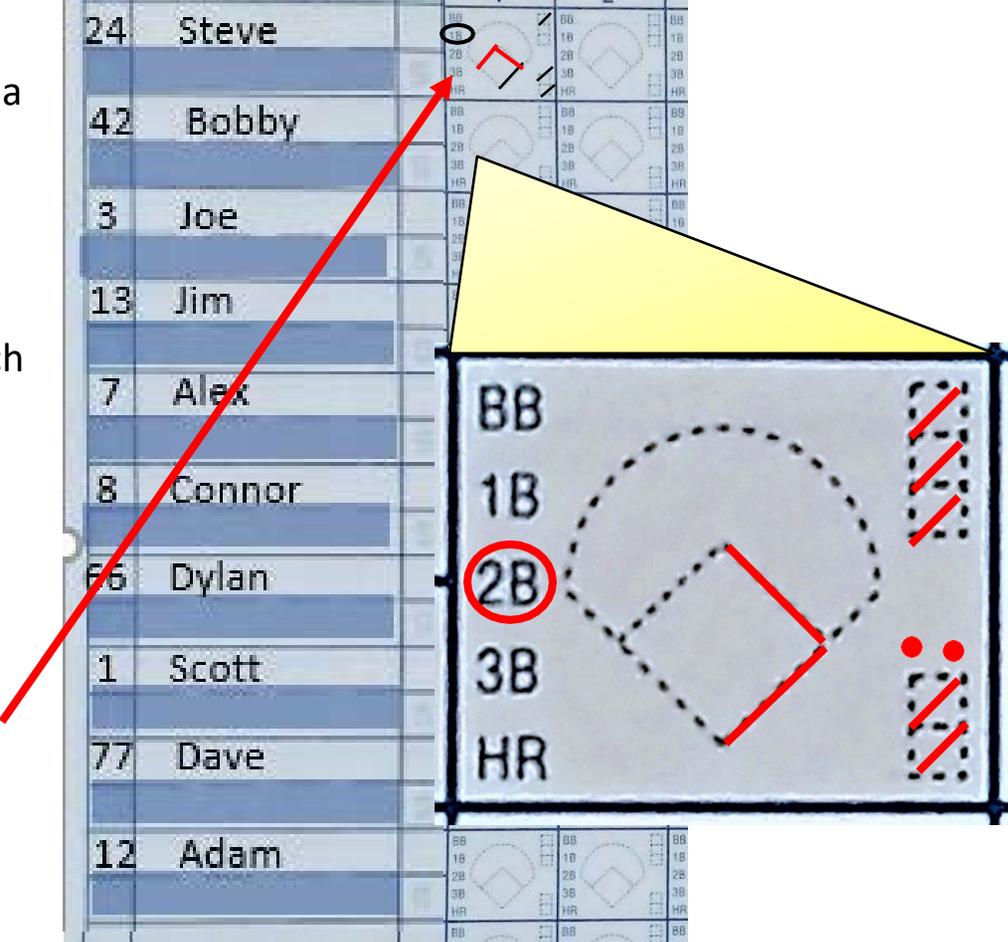

Bobby (#42) is up next. He's got a great at-bat, with three balls, two strikes, two foul-offs, and finally hits a double.

Record the balls, strikes, and foul-offs. You'll notice there isn't room for the additional foul balls, but we still need to document them to keep an accurate pitch count. Mark these with dots, above the strikes.

Then record his double, and draw the line showing Bobby is at second base.

Bobby's hit advanced Steve along the bases as well, and you document that by drawing a line in Steve's box showing Steve on third base (see red lines in Steve's box).

NO	PLAYERS	PITCHES	1	2
24	Steve	BB 1B 2B 3B HR		
42	Bobby	BB 1B 2B 3B HR		
3	Joe	BB 1B 2B 3B HR		
13	Jim	BB 1B 2B 3B HR		
7	Alex	BB 1B 2B 3B HR		
8	Connor	BB 1B 2B 3B HR		
65	Dylan	BB 1B 2B 3B HR		
1	Scott	BB 1B 2B 3B HR		
77	Dave	BB 1B 2B 3B HR		
12	Adam	BB 1B 2B 3B HR		

Next up is Joe (#3). He strikes out swinging in 3 pitches.

Document the strikes, then the strike out as a “Ks.”
Had Joe NOT swung, it would have just been a “K.”

Note: you can also document a strike-out swinging with a backwards “K.”

NO	PLAYERS	PGS	1	2
24	Steve			
42	Bobby			
3	Joe			
13	Jim			
7	Alex			
8	Connor			
66	Dylan			
1	Scott			
77	Dave			
12	Adam			

a

Jim (#13) is up next. He takes 2 balls and hits a double.

Steve scores off the hit, and Bobby moves to 3rd base.

Document Jim's balls and the double, including drawing the line showing Jim is at 2nd base.

Then, moving up the column, advance Bobby to 3rd.

Moving up the column again, advance Steve to home and color in the diamond. This makes it easy to tally the runs at the end of the inning.

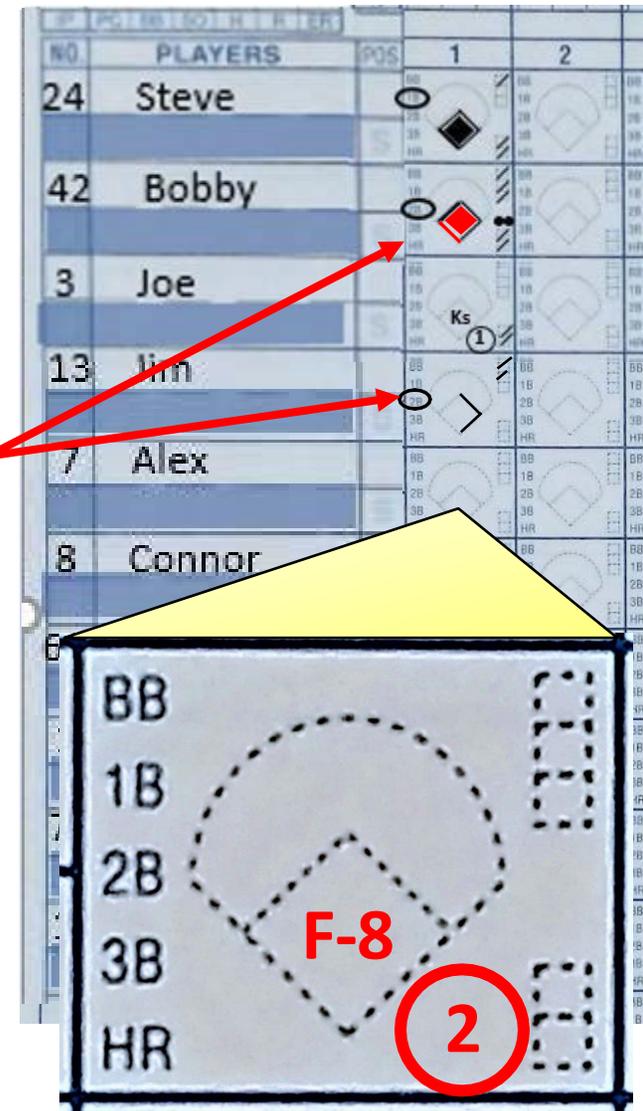

NO	PLAYERS	POS	1	2
24	Steve		BB	
42	Bobby		BB	
3	Joe		BB	
13	Jim		BB	
7	Alex		BB	

BB			
1B			
2B			
3B			
HR			

Next to bat is Alex (#7). He hits on the first pitch, but the ball is caught by the center fielder. This is called a Fly Out, and is documented as an F8 for the 2nd out.

The ball was hit deep enough that Bobby is able to score, but Jim stays put at 2nd.

Draw the line showing Bobby came in, and fill in his diamond. Nothing happens to Jim's box, because he didn't move.

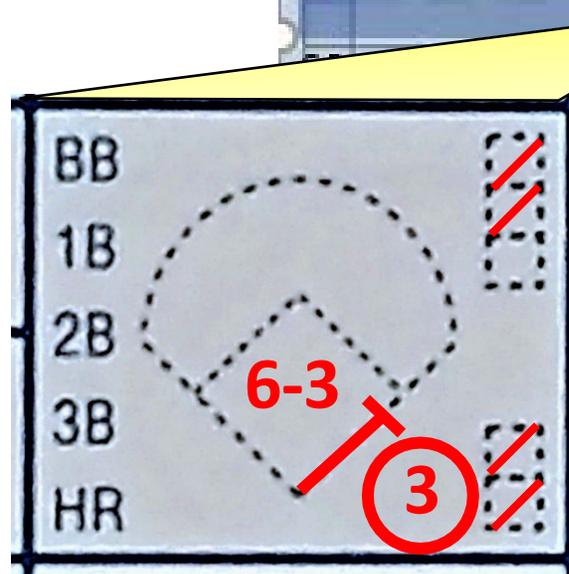

Batting next is Connor (#8). He takes 2 balls and 2 strikes, then hits a ground ball to the shortstop who throws to first for the final out of the inning.

Outs like this are documented by showing who fielded the ball, then where it was thrown to get the out. In this case, the play is a 6-3 (shortstop to 1st base).

Because this is the third out in the half-inning, we can add that diagonal mark OR heavy horizontal line and a squiggly line to remind us the first inning is complete.

8	Connor			

Pitch counts

You may recall that we've mentioned a pitch count. A pitch count is exactly that – keeping track of how many pitches were thrown by each pitcher during a game.

You'll have a pitch counter in the scoreboard with you. At the end of every inning, or when a pitcher is removed from the pitching mound, you and the pitch counter will need to confirm you have the same number of pitches.

The pitch counter's sheet looks like this or will be listed in a long column, as you may see for D9 tournaments:

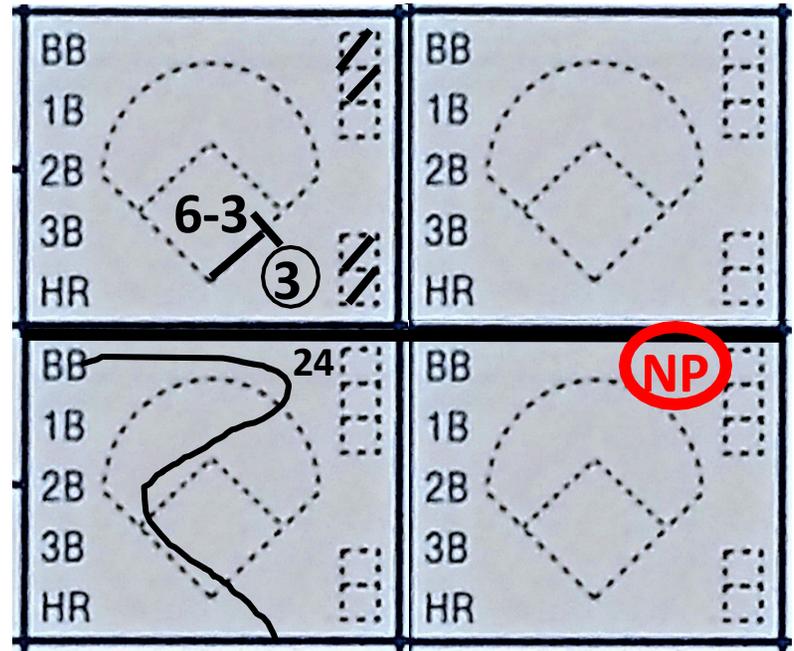

HOME TEAM:										Date:										Time:																
Player Name		Jersey	League	Age																																
					1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30		
					31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60		
					61	62	63	64	65	66	67	68	69	70	71	72	73	74	75	76	77	78	79	80	81	82	83	84	85	86	87	88	89	90		
					91	92	93	94	95	96	97	98	99	100	101	102	103	104	105																	

They've placed a tally mark in a box every time a pitch is thrown. The last box with a tally mark indicates the total number of pitches thrown by that pitcher so far in the game.

When a pitcher is moved to another position, a new pitcher will come in to continue the game. You'll document this with "NP" (for a new pitcher) in the box for the first batter the new pitcher faces.

This most commonly happens between innings, because many coaches are trying to give as many players the chance to pitch as possible.

Occasionally a coach will change pitchers between innings; the only difference in how you document the change is that it won't be immediately under the thick line you drew to help remember where to start the next inning.

Next, you'll need to document the final pitch count for the pitcher that left the mound, and the name of the pitcher coming in to continue the game. We've touched on this before, but let's go into more detail now.

Matt started the game pitching, so you'll put Matt's number and name in the first line for pitchers at the beginning of the game.

Matt pitched for the 1st inning, and Billy came in to pitch for the 2nd inning.

You'll recall that there were 24 pitches thrown for the first inning (you can confirm this at the bottom of the inning). Once Billy starts warming up, write 24 next to Matt's name, and write in Billy's name and number on the next line.

Continue this pattern for future pitching changes.

Congratulations!

You made it all the way through! By now you should have a good sense of how this scorekeeping thing works.

We're hopeful this information has given you enough information and you feel confident to score a game.

Here are a few final notes, reminders, and tips:

- ❖ Try your best.
- ❖ Learn something every time you score!
- ❖ Mistakes are inevitable. That's why we use pencil!!
- ❖ Some scorekeepers prefer to add color to their book. If you want to try it, the most common color uses are:
 - RED for outs
 - Some scorekeepers use different colors for each pitcher and indicate pitching changes with a colored line to indicate where the pitching change occurred.
- ❖ You are NOT expected to know all the rules of baseball.
- ❖ The umpire is a priceless resource. If you're not sure what happened, ASK!
- ❖ You are equally important to the umpire. They'll often ask you what the count on a batter is, what the pitch count is, etc.

❖ Always remember that the scorekeeper's job is documentation. Should something happen during the game that doesn't get caught (batting out of order, incorrect call, etc.) by a manager or coach, the scorekeeper simply documents what happened. The scorekeeper should NEVER call a manager or coach's attention to a discrepancy.

❖ Common abbreviations (not all of which have been fully reviewed above):

○ Ways to get on base:

- BB (walk)
- 1B (single)
- 2B (double)
- 3B (triple)
- HR (home run)
- HBP (hit by pitch)

○ Ways to get out at the plate:

- K (strike out looking)
- Ks (strike out swinging)

○ Ways to get out on the baseline:

- # - # (play on the ball)
- CS (caught stealing)
- RI (runner interference)
- DP (double play)

○ Ways to advance on the baseline:

- SB (stolen base)
- OT (overthrow)
- For more advanced scorekeepers:
 - E-# (error)
 - PB (passed ball)
 - WP (wild pitch)
